## SMART ENERGY IN SMART AALBORG - on the way to becoming 100 % fossil free

The city council in Aalborg has decided to outphase coal from the local CHP plant Nordjyllandsværket by 2028. This requires that a combination of renewable energy sources is implemented in the district heating system. For several years, the utility has been considering sustainable alternatives, especially excess heat, geothermal solutions, large heat pumps, pit storages, solar and wind power.

On this technical tour, we will take a bus trip around Aalborg and gain insight into various renewable energy sources and examples of collaboration between the municipality, the utility, businesses, the university and citizens, who are all involved in testing and developing new, green solutions.

---

**Price:** 56 EUR incl. VAT (Refreshments included).

**Pick up** at First Hotel Aalborg. Rendsburggade 5, 9000 Aalborg. **Meeting time: 9 AM.**

**Drop off** at Aalborg Airport (*bring your baggage on the bus*) and First Hotel Aalborg.

**Registration:** [smartenergysystems.eu/conference-2020](https://smartenergysystems.eu/conference-2020)

Deadline for registration: 31 August 2020

The technical tour is organised by Green Hub Denmark.
