

Fernwärmeatlas

An Online Tool to Collect Information about District Heating Systems in Germany

presented by Johannes Pelda

Supported by:

on the basis of a decision by the German Bundestag

This research is funded by the Federal Ministry for Economic Affairs and Energy (BMWi) within the funding area Energy System Analysis of the 6th Energy Research Program (FKZ 03ET4071) in the period of November 2018 to October 2021

Powered by

6th International Conference on Smart Energy Systems
6-7 October 2020
#SESAAU2020

1. Introduction
2. Features of the FERNWÄRMEATLAS
3. Solarthermal potential and industrial waste heat potential
4. Outlook

Powered by

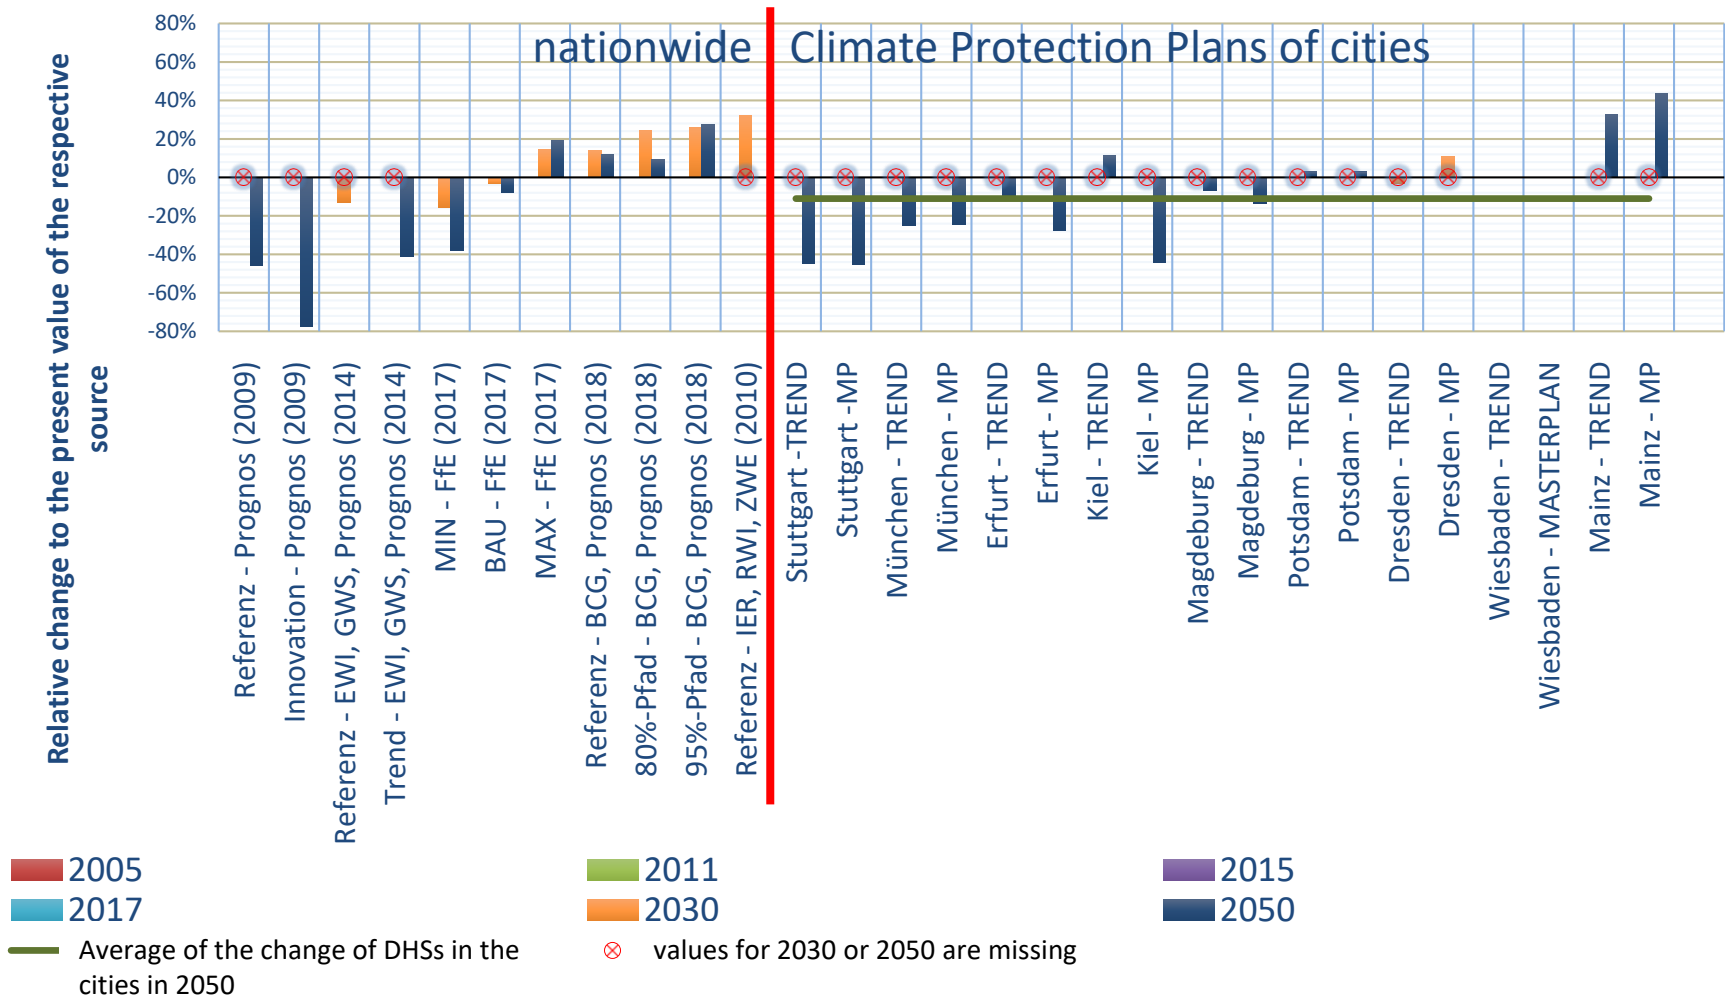

Share of district heating on the overall heating demand in Germany in %

Source: „Anwendungsbilanzen für die Energiesektoren in Deutschland in den Jahren 2013 bis 2016“ AGEB, AG Energiebilanzen; im Auftrag vom Bundesministerium für Wirtschaft und Energie, Berlin Nov 2017

Szenarios about the development of district heating in specific cities

How to provide a public available and active data collection about DHSs?

How to obtain information necessary to elaborate transformation paths into the 4th generation of DHSs?

How can this database help to strengthen and work out the advantages of DHSs more easily?

Data availability

Potential of DHSs to reduce CO₂ emissions in the heating sector

Data about network design is mostly restricted

No current data on key figures of district heating systems

Waste heat utilisation

Solarthermal power

Geothermal power

Sector coupling

Menu

Hallo jpled, hier können Sie auf Informationen des Fernwärmenetzatlas zugreifen und diese auch bearbeiten!

Städte

Fernwärmenetze

Wärmeschienen

Wärmequellen

Betreiber

- Analysis were conducted for cities with more than 100,000 inhabitants, existing DHS or connected to an integrated district heating grid
- Other cities available on demand
- Participation on the Fernwärmeatlas through free registration
- www.fernwaerme.atlas.hawk.de (preliminary version)

District heating systems

Hallo jpelda, hier können Sie auf Informationen des Fernwärmenetzatlas zugreifen und diese auch bearbeiten!

Fernwärmenetze Menü

Name	Stadtteil	Wärmequellen	Netzlänge in km	Anschlüsse	min. V-Temp. in °C	max. V-Temp. in °C	min. R-Temp. in °C	max. R-Temp. in °C	
Fernheizkraftwerk Neukölln	Berlin Neukölln	1	100	40000	0	0	0	0	
Fernwärmenetz 1		1	0	0	0	130	0	0	
Fernwärmenetz 1		1	0	9649	0	0	0	0	
Fernwärmenetz 1		1	224	517	0	0	0	0	

Add a new DHS

Fernwärmenetz hinzufügen

Name	<input type="text" value="null"/>
Stadtteil	<input type="text" value="null"/>
Netzlänge	<input type="text" value="null"/> km
Anschlüsse	<input type="text" value="null"/>
min. V-Temp.	<input type="text" value="null"/> °C
max. V-Temp.	<input type="text" value="null"/> °C
min. R-Temp.	<input type="text" value="null"/> °C
max. R-Temp.	<input type="text" value="null"/> °C

Edit an existing DHS

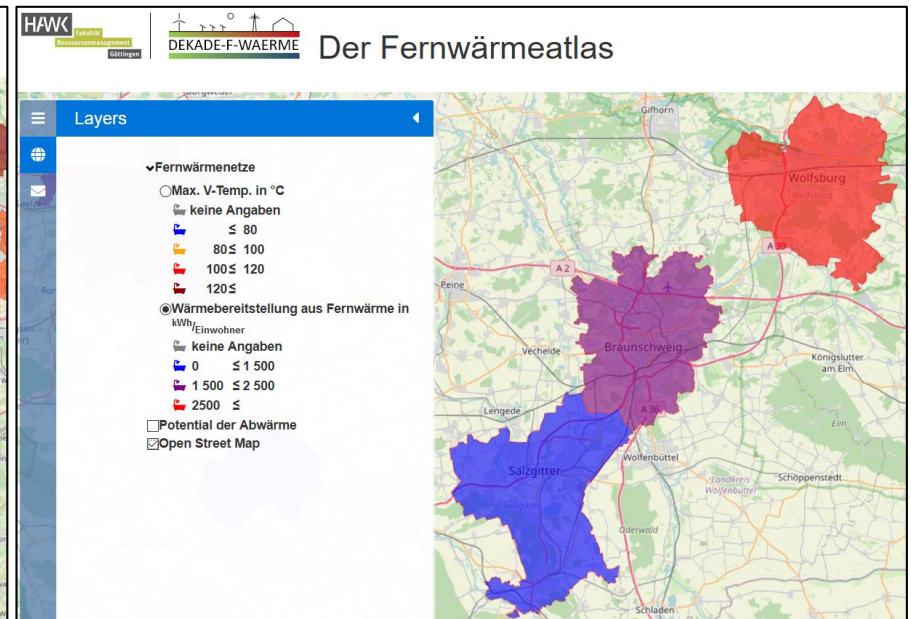

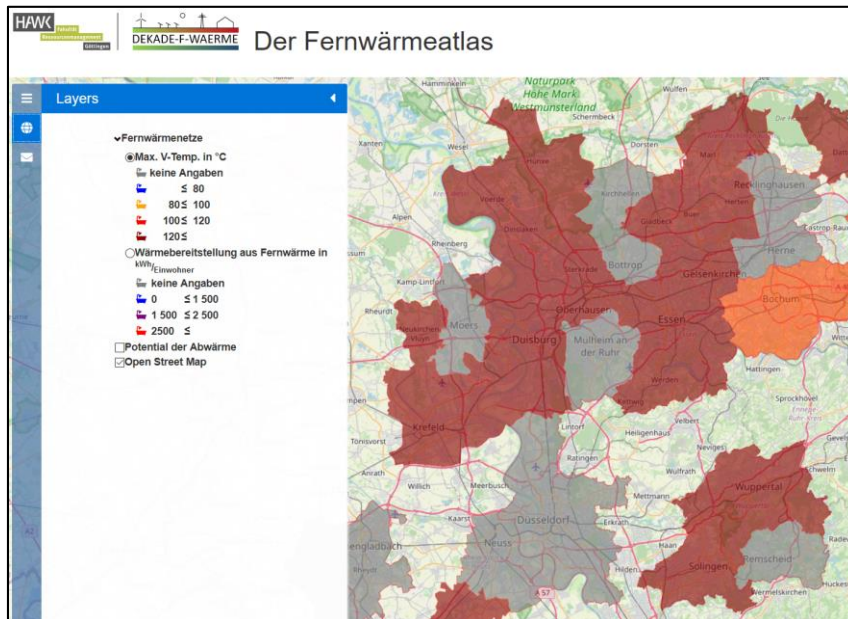

Fernwärmenetz bearbeiten

Name	<input type="text" value="Fernwärmenetz 1"/>
Stadtteil	<input type="text"/>
Netzlänge	<input type="text" value="160"/> km
Anschlüsse	<input type="text" value="0"/>
min. V-Temp.	<input type="text" value="85"/> °C
max. V-Temp.	<input type="text" value="130"/> °C
min. R-Temp.	<input type="text" value="55"/> °C
max. R-Temp.	<input type="text" value="60"/> °C

Temperature levels of specific district heating systems

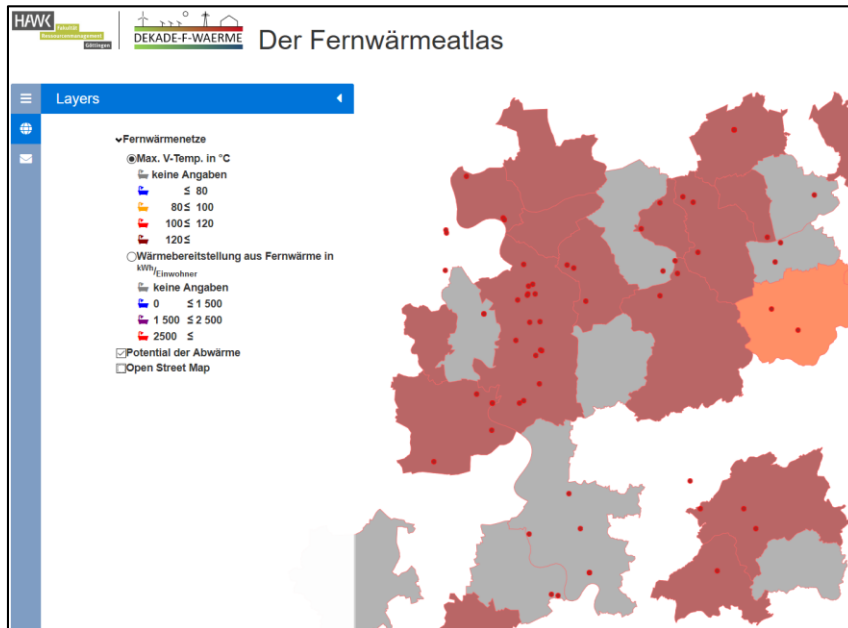

Share of district heating on the overall heat demand in the cities of Salzgitter, Braunschweig and Wolfsburg

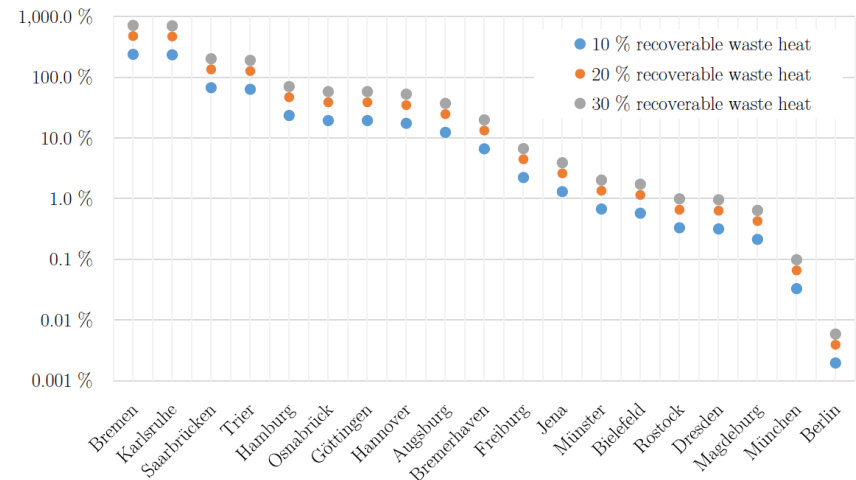

AALBORG UNIVERSITY
